

# Utility Update on EE Programs relative to NJCEP Transition

May 26, 2021

# Program Administration

June 10, 2020 NJ BPU Order

## ▶ Consistent administration of Core Programs:

### ▶ Residential Programs

- ▶ Whole home EE solutions, prescriptive incentives, efficient products, online marketplace, and appliance recycling
- ▶ Specific opportunities for low- and moderate-income customers to access prescriptive EE incentives and EE products

### ▶ Commercial and Industrial Programs

- ▶ Existing buildings, including hospitals, and including prescriptive rebates, custom measures, direct install, and whole building solutions.
- ▶ Specific opportunities that ensure access for small commercial customers
- ▶ Comprehensive opportunities for existing commercial and industrial buildings interested in whole building EE solutions

### ▶ Multifamily Programs

- ▶ Standalone programs
- ▶ Comprehensive opportunities for existing buildings, including prescriptive rebates, custom measures, and whole building solutions
- ▶ Particular attention to effectively serving the affordable and/or other low- and moderate-income and/or subsidized housing sectors
- ▶ Minimizing/eliminating as many of the barriers to EE adoption in multifamily housing as possible

# Program Coordination

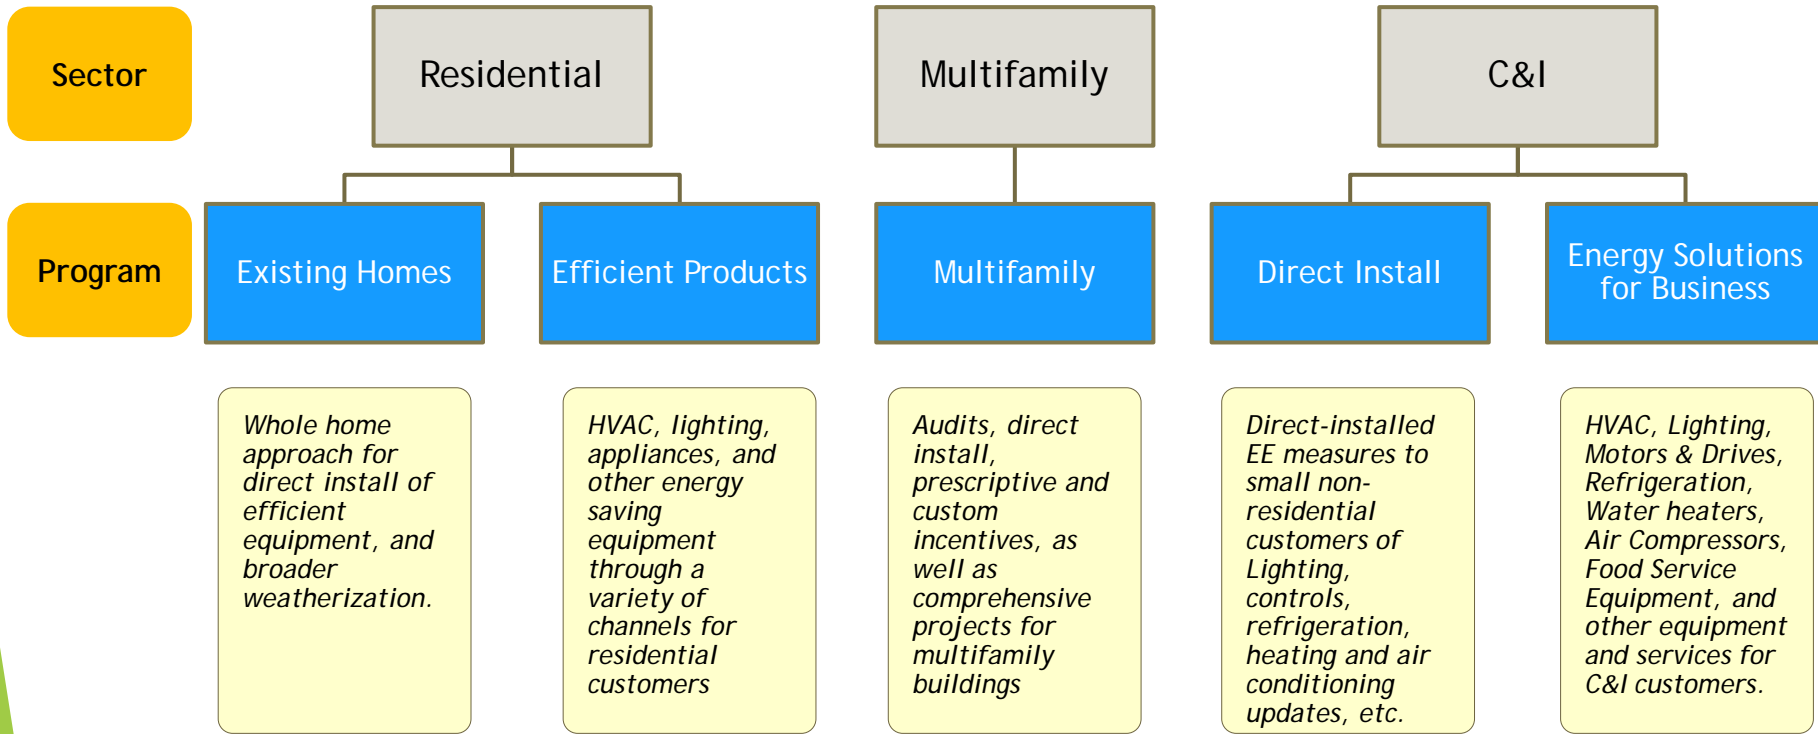

- ▶ Utilities will independently run core program offerings, but coordinate to provide similar experiences utilizing, where applicable:
  - ▶ Common forms for contractors and customers
  - ▶ Contractor requirements
  - ▶ Customer and contractor engagement platforms
  - ▶ Customer and property eligibility requirements
  - ▶ Eligible measures
  - ▶ Financing availability
  - ▶ Incentive payment processes and timeframes
  - ▶ Incentive ranges
  - ▶ Quality control standards and remediation policies

# Statewide Coordinator System

- ▶ In addition to the common program elements shown on the prior slide, the Utilities will deliver programs that target both Electric and Gas savings opportunities by leveraging a Statewide Coordinator (SWC) system
- ▶ The SWC system will interconnect Utility systems and allocate energy savings and costs by fuel type
- ▶ Use of the SWC will benefit customers, contractors and other program allies through
  - ▶ Reduced program applications and data requirements
  - ▶ Simplified incentive/rebate process
  - ▶ Screening for certain program pre-requisites and in-process applications

Lead Utility and Partner Utility -  
working together to serve customer and contractor needs

# Utility Programs

The utilities will address key customer segments and participation pathways through consistently delivered core utility programs and additional Utility-led initiatives to provide comprehensive solutions for their customers.

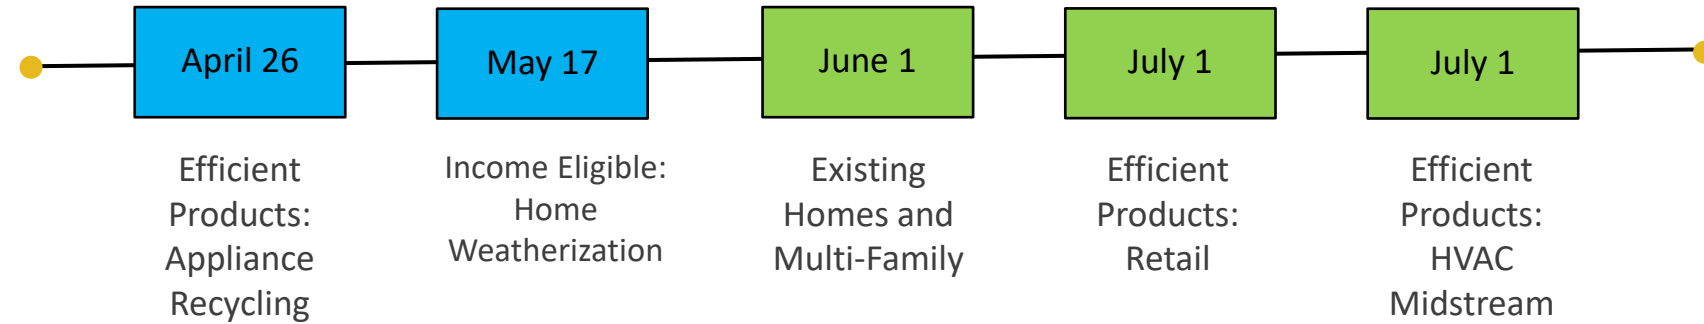

# Launch Information

- ▶ Most utilities will launch the programs transitioning from NJCEP on July 1
- ▶ Some of the other newer program offerings may launch in Late Summer/Early Fall
- ▶ The NJCEP transition webpage will post contact information for where to find out more information about each utility's launch as well as contact information for residential and commercial programs
  - ▶ Reach out to utilities where you may be interested in doing business. Explore the information they have posted and reach out if you have questions.
  - ▶ While the utilities are striving for consistency in the market, there are some unique elements (e.g. financing options, online forms) that you will need to get specific updates from each utility
  - ▶ Most are looking to book a contractor-specific information session in mid to late June.

Utilities appreciate your patience during this transition
